

Elixir Crawlspace Doors

Elixir Door & Metals Company has identified several flaws with the typical crawlspace access door that is on the market today. In order to solve these problems, we have developed our own design. With high quality and cost efficiency in mind, we are now offering the Elixir Crawlspace Door to our customers.

One of the major problems we identified with current crawlspace doors is that they have a propensity to rust. Rusting not only creates an eyesore, it also prevents latches and hinges from functioning correctly. We designed our crawlspace door to alleviate this issue by constructing the door frame and core surround out of aluminum. The core of the door is removable from the frame to aid in unobstructed access to the crawlspace while working under the structure. The latching system is simple, yet effective, and allows for the door to be optionally locked with a padlock for security and safety.

Manufacturing Division

Elixir Door & Metals Company - Division 24
1215 Pope Drive, Douglas GA 31533
Tel: (912) 493-2200 • Fax: (912) 384-0047

Supplying Divisions

• Div. 55 - Waco, TX

• Div. 81 - Tuscumbia, AL

FEATURES & Hardware

- Constructed with an aluminum frame
- Removable door core for easy access
- Energy efficient insulation
- Safe and secure latching system
- Sizing available for three standard openings
 - 24" x 24" (Part# 24-552-0000)
 - 32" x 24" (Part# 24-552-0001)
 - 32" x 32" (Part# 24-552-0002)
- Aesthetically appealing
- Can be mounted flush or recessed in the opening
- Easy to install (during construction or as a replacement door)

MADE IN THE U.S.A.
